

Sign-Up Today for an Adapted Toy to Make Playtime Fun!

Child Development Clinic
Department of Pediatrics

The University of Illinois College of Medicine Peoria's Child Development Clinic within the Department of Pediatrics is coordinating Switch on the Joy supported by donors and volunteers to offer free, adapted toys to children.

Having a new, fun toy that is made accessible for ease of operation brings joy to children with disabilities or complex medical needs. Switch on the Joy brings together the generosity of donors and volunteers to make simple modifications to new toys using switches to gift children with accessible toys.

While these toys are indeed fun for all children, Switch on the Joy is an initiative specifically designed for children with intellectual or physical disabilities and/or complex medical needs.

To sign up for a toy, simply complete this online form between October 1 and November 14, 2026:
